Sameer Dhakad

+91-7424880665 | sameerdkh21@gmail.com | New Delhi, India | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full-stack engineering undergraduate with a strong passion for developer education, technical documentation, and product building. Proficient in the MERN stack, Next.js, Python, and SQL with multiple projects hosted on GitHub. Experienced in creating technical content, evaluating AI tools for workflow automation, and debugging complex code. Active hackathon participant driven by a curiosity to build functional apps and explain technical concepts simply to bridge the gap between engineering and learning.

EDUCATION

Degree / Examination	Institute / Board	Year	Score
B.Tech in Computer Science Engineering	SRM Institute of Science and Technology	2023 – 2027*	**8.75 / 10.0**
Class XII (Senior Secondary)	The Lotus International Sr. Sec. School	2022	**87.8%**
Class X (Secondary)	The Lotus International Sr. Sec. School	2020	**94.0%**

**expected graduation*

TECHNICAL SKILLS

- **Full-Stack & Web:** MERN Stack (MongoDB, Express, React, Node.js), JavaScript, HTML/CSS
- **Databases & Backend:** PostgreSQL, SQL, Python, C++, Backend Scripting, Postman
- **Tools, DevOps & Workflows:** Advanced Git & GitHub (Version Control, PRs, Branching), System Design Concepts
- **Instructional & AI Tools:** Technical Writing, Code Review, Generative AI (LLMs) for app building

PROFESSIONAL EXPERIENCE

Tech & Marketing Intern | Bhanzu *May 2026 – Jul 2026*

- Authored comprehensive technical documentation, translating complex software workflows into clear, easy-to-understand guides for non-technical teams.
- Tested features, reviewed software bugs, and provided constructive feedback to the engineering team for rapid resolution.
- Built and evaluated simple workflows using Generative AI tools (LLMs) to demonstrate how tech can automate repetitive tasks.

Software Developer Intern | Yuga Yatra Retail (OPC) Pvt. Ltd. *Jul 2026 – Sep 2026*

- Gained hands-on experience building backend APIs and writing custom PostgreSQL queries, reflecting real industry practices.
- Collaborated using Git/GitHub version control to maintain clean code and integrate database features smoothly.

Campus Ambassador Intern | DevTown *Aug 2024 – Feb 2025*

- Coordinated student outreach for technical coding workshops, fostering a community of learners and simplifying tech education.
- Developed strong communication skills by interacting with peers and explaining the value of practical, project-based tech skills.

DEPLOYED PROJECTS & GITHUB REPOSITORIES (4+ TECH STACKS)

Settle — Group Expense Splitter (MERN Stack) Code | *Jul 2026*

React.js, Node.js, MongoDB, Git (Live Deployment)

- Designed a full-stack educational-grade web application to demonstrate complex data handling (expense splitting).
- Maintained a clean GitHub repository with clear commits, branch management, and well-structured project documentation.

AP2-Gateway (Python / API Stack) Code | *Sep 2026*

Python, Node.js, AI Integration, Hackathon Build

- Built an agentic payment verification gateway for the Razorpay AI Buildathon, showcasing ability to build fast, simple apps using AI.

Financial Transaction Ledger (SQL / Relational Stack) Code | *Oct 2025*

Node.js, PostgreSQL, System Design Basics

- Developed a hands-on project to manage simulated transactions, utilizing explicit SQL blocks to ensure data integrity.

ACHIEVEMENTS & EXTRA-CURRICULARS

- **Academic Excellence:** Consistently maintained high academic standing, securing a **9.48 SGPA** in Semester 5 and a **9.25 SGPA** in Semester 6.
- **Flipkart GRID 8.0 Semi-Finalist (Aug 2026):** Demonstrated strong system design logic and problem-solving in a high-stakes national engineering competition.
- **DTU RiseIn Hackathon — 3rd Place (Sep 2023):** Built and deployed a functional web prototype under a strict 24-hour sprint, proving the ability to turn concepts into real skills rapidly.
